Badani Corporation has got a good handle over international and domestic market prices with the magnitude of its volume.

Mission

Our mission is clear to revolutionize the agricultural industry. We aim to drive progress through continuous innovation. Empowering global markets with quality and trust. We strive to uplift farming communities through sustainable practices.

Delivering excellence in every grain, seed, and spice we export.

Vision

Our vision is to be the premier leader in the agricultural industry with unwavering commitment. We aspire to set new benchmarks in quality, sustainability, and global reach. Driven by innovation, we aim to redefine agro excellence worldwide. Empowering agriculture, enriching lives that's the future we see.

Our Benefits

PROVIDING HIGH QUALITY PRODUCTS

At Badani Corporation, our commitment to providing high-quality products is unwavering. From sourcing the finest raw materials to employing stringent quality control measures, we prioritize excellence at every stage of production. Our dedication to quality ensures that each product bearing the Badani Corporation name is synonymous with reliability, purity, and superior performance.

OUR PROCESSED

PRODUCTS

PEANUTS

1. Blanched Peanuts

Our blanched peanuts are processed using a gentle heat-sorting method that removes the skin while keeping the nut entirely intact and pristine. These creamy-white kernels are the gold standard for high-end snacks and gourmet peanut butter. By removing the skin, we eliminate any bitterness, leaving a sweet, mild flavor and a satisfying crunch that premium food brands demand.

- Types: 41/51 & 51/61 Whole & Split counts/ounce

2. Ground Peanuts

We source the finest groundnuts, known for their high protein content and rich oil profile. These kernels are carefully selected for their size and uniform color, making them perfect for roasting, frying, or oil extraction. Available in Three the "Bold", "Java" and "Tj" varieties, our peanuts are processed to ensure they arrive at their destination as fresh as the day they were harvested.

- Types: Bold: 35/40, 38/42, 40/50, 50/60, 60/70 & 80/90
- Java: 50/60, 60/70 & 80/90
- Tj: 50/60, 60/70 & 80/90

3. Peanut In Shell

Our in-shell peanuts are a favorite for the roasting and snacking industry. We select only the brightest, cleanest, and sturdiest shells to ensure that the kernels inside are perfectly protected during transit. These peanuts represent the most natural form of the crop—unprocessed, additive-free, and full of traditional garden-fresh flavor.

- Types: 18/22 & 20/24

SPICES

1. Coriander Seeds

Our coriander is bright, citrusy aroma and uniform, golden-brown seeds. Sourced from regions with ideal soil conditions, our coriander provides a perfect balance of sweet and spicy notes. Whether exported as whole seeds or split, we ensure the volatile oils are preserved, making it an essential ingredient for spice blenders, meat processors, and beverage manufacturers worldwide.

- Types: Eagle, Scooter & Parrot

2. Cumin Seeds

Known for its deep, smoky warmth and pungent aroma, our cumin is the "backbone" of authentic international cuisine. We export premium-grade cumin that is sun-dried to lock in its intense flavor. With its rich, earthy profile and high oil content, our cumin is a staple for distributors supplying the curry, bakery, and seasoning industries across the globe.

- Types: Singapore & Europe
- Purity: 99%, 99.5% & 98%

3. Fenugreek Seeds

Our fenugreek seeds are selected for their firm texture and distinct bittersweet, maple-like aroma. Widely used in medicinal, nutraceutical, and culinary sectors, our fenugreek is processed to ensure clean, stone-free batches. It is a vital component for pickling agents and high-end spice blends where depth of flavor is a priority.

- Sortex Clean

4. Fennel Seeds

Characterized by its sweet, anise-like flavor and vibrant greenish-yellow hue, our fennel is harvested at the peak of maturity. It is highly sought after by the confectionery, tea, and health-supplement industries. We take pride in exporting fennel that retains its natural freshness and cooling digestive properties from farm to port.

- Types: Singapore & Eagle
- Purity: 99%, 99.5% & 98%

5. Turmeric Finger

Our turmeric fingers are celebrated for their deep orange-yellow color and high curcumin content. Harvested and cured with traditional care, these "golden fingers" are exceptionally hard, well-dried, and free from internal mold. They are the preferred choice for the pharmaceutical, cosmetic, and food industries looking for natural, potent coloring and health properties.

6. Chilli

We export a variety of dried chillies, ranging from mild and bright red to intensely spicy. Our chillies are carefully dried to maintain their skin integrity and natural heat levels. Whether you require them for their vibrant red coloring properties or their fiery pungency, our chilli selection meets the diverse heat-level requirements of the global market.

7. Dry Ginger

Our dry ginger is selected for its low fiber content and sharp, peppery taste. Carefully peeled and dried to prevent any moisture buildup, it offers a long shelf life and consistent flavor profile. It is a versatile export, used extensively in the beverage, bakery, and traditional medicine industries for its warming properties and digestive benefits.

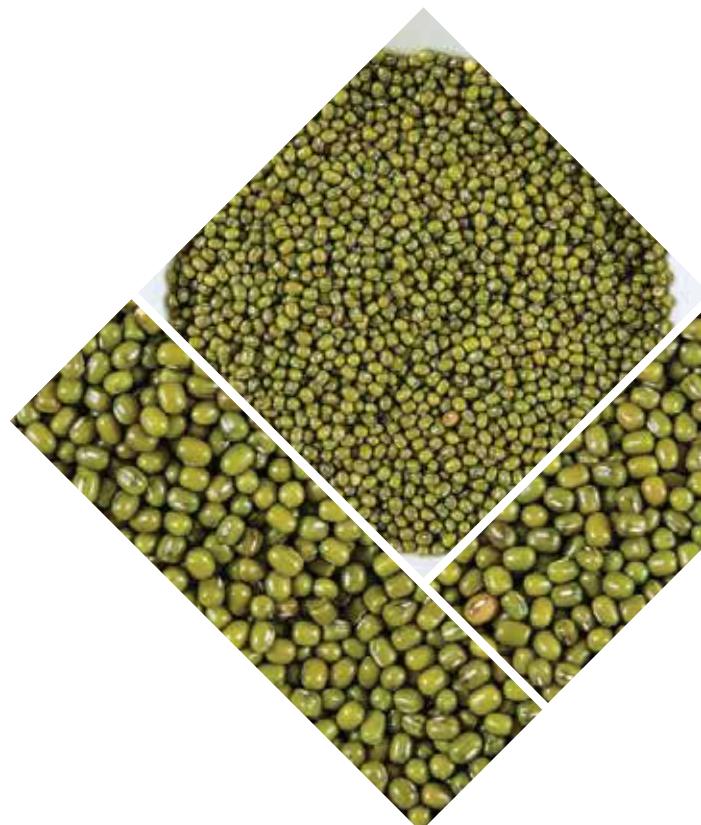

PULSES

1. Green Moong

Our Green Moong is recognized for its vibrant color, uniform size, and high germination rate. Sourced from the best pulse-growing belts, these beans are easy to cook and rich in plant-based protein. We ensure a rigorous cleaning process to provide a "polished" or "unpolished" finish that meets the strict aesthetic and nutritional standards of the global health-food market.

- Size: 3 MM & 3.5 MM

2. Desi Chana

Our Desi Chana is a powerhouse of nutrition, characterized by its smaller size, thick dark coat, and nutty flavor. As a staple for the flour (Besan) and snack industries, we export Chana that is carefully dried to ensure a long shelf life and consistent texture. Its high fiber content and low glycemic index make it a preferred choice for health-conscious consumers worldwide.

3. Chickpeas

We export premium Kabuli Chickpeas known for their large diameter, smooth creamy texture, and bright white-to-beige color. These are highly sought after by the canning industry and Mediterranean food manufacturers (for Hummus and Falafel). Our chickpeas are sorted by millimeter size to ensure uniformity, providing your customers with a visually perfect and culinary-consistent product.

- Types: 42/44 & 44/46

4. Soybeans

Our Soybeans are high-protein, high-oil seeds that serve the dual purpose of food consumption and oil extraction. We focus on exporting non-GMO varieties that are clean, yellow, and free from cracked husks. Whether for soy milk production, tofu manufacturing, or high-quality animal feed, our soybeans are handled with care to maintain their biological value and nutritional integrity during transit.

- Sortex Clean

SEEDS

1. White Sesame Seeds

Our Natural White Sesame Seeds are sourced from the finest crops, known for their high oil content and nutty, delicate flavor. These seeds are meticulously cleaned to ensure a uniform, bright appearance. They are a versatile essential for the global bakery, confectionery, and oil-crushing industries, offering a perfect crunch and a rich nutritional profile to any product.

- Purity: 99% & 98%

2. Hulled Sesame Seeds

Processed in state-of-the-art facilities, our Hulled Sesame Seeds undergo a chemical-free mechanical hulling process that removes the outer skin while preserving the seed's nutritional integrity. The result is a snow-white, soft-textured seed that is highly prized by premium bakeries and tahini manufacturers for its aesthetic perfection and smooth flavor.

- Purity: 99.97%, 99.99% & 99.90%

3. Z Black Sesame Seeds

Our Black Sesame Seeds are distinguished by their deep, jet-black hue and a more robust, earthy flavor compared to white varieties. Rich in antioxidants and minerals, these seeds are in high demand for the Asian culinary market, health-food sectors, and oil extraction. We ensure that our black sesame is thoroughly cleaned to maintain its characteristic sheen and intense aromatic properties.

- Sortex Clean

4. Chia Seeds

We export premium-grade Chia Seeds. Our seeds are harvested and processed to ensure they are free from impurities and maintain their high mucilaginous properties. Whether for the beverage industry, retail health-packs, or as a nutritional additive in baked goods, our chia seeds represent the pinnacle of quality and wellness.

- Type: Black / White chia seeds
- Sortex Clean

GRAINS

1. White Rice

We export premium White Rice, known for its high degree of milling and polished finish. Sourced from the finest paddy fields, our rice is processed to ensure it is free from husks, dust, and stones. Our rice is characterized by its excellent cooking properties, non-sticky texture, and brilliant white appearance—meeting the dietary demands of markets worldwide.

- Varieties: IR64, Swarna, Basmati, Non-Basmati, Sona Masoori, Parboiled, Long Grain, Short Grain

2. Wheat

Our export-grade Wheat is selected for its superior gluten strength and high protein content. We provide clean, bold grains that are ideal for the flour milling industry, bakery production, and pasta manufacturing. By maintaining strict moisture controls and utilizing advanced cleaning technology, we ensure our wheat is free from impurities and shriveled grains, offering high extraction rates for our global partners.

RAISINS

We offer a premium selection of Raisins, including Black, Golden, and Green varieties. Our raisins are harvested from the best vineyards and dried under controlled conditions to retain their natural sweetness, chewy texture, and vibrant color. Each batch is meticulously sorted to ensure uniform size and the absence of stems or caps, making them a perfect choice for the confectionery, bakery, and snack industries.

- Varieties: Black, Golden, Green

GARLIC

Our Garlic is prized for its strong, pungent aroma and firm, multi-cloved bulbs. As an exporter, we focus on providing garlic with bright white or purple skins that are well-cured to withstand long-distance sea freight. We ensure the roots are neatly trimmed and the bulbs are free from internal moisture or sprouts, guaranteeing a product with maximum shelf life and intense flavor for culinary and medicinal use.
